

OECD CHAMPION MAYORS

for Inclusive Growth

19 October 2017
Conrad Hotel | Seoul, Korea

The Third Meeting of Champion Mayors for Inclusive Growth will build on the commitments set out in the **New York Proposal** (March 2016) and the concrete actions outlined in the **Paris Action Plan** (November 2016). It will focus on the implementation of two key themes: how cities can simultaneously tackle climate change and inclusive growth, and how they can level the playing field for small and medium-sized businesses (SMEs).

The morning session will be comprised of two interactive panel discussions with Mayors. In the first panel, Mayors will share how they are successfully bridging their strategies for climate change and inclusive growth. In the second panel, a second round of Mayors will describe their efforts to strengthen support for small businesses and entrepreneurs. The morning will conclude with the launch of the **Seoul Implementation Agenda**, which will outline a set of commitments, indicators and monitoring tools to advance the dual themes.

The afternoon will kick-off with two rounds of thematic parallel sessions. These smaller, interactive discussions will bring together Mayors and city leaders. The first round of parallel sessions will centre on people and places, with a discussion on the concrete tools that can help cities in different policy domains, including housing and land use, along with a special session focusing on solutions to support women and children. The second round of parallel sessions will focus on critical pieces of the implementation puzzle: financing and stakeholder engagement for inclusive, green growth. The event will also be the occasion to launch the **OECD Case Study of Inclusive Growth in Seoul**, a study that highlights how Seoul Metropolitan Government is implementing its agenda for a more inclusive city, as well as the **OECD Inclusive Growth web platform**.

In the concluding roundtable, Champion Mayors will be joined by Mayors participating in the next day's Mayors' Forum on Climate Change, co-organised by Seoul Metropolitan Government, the Global Covenant of Mayors and ICLEI.
